

# Year 5

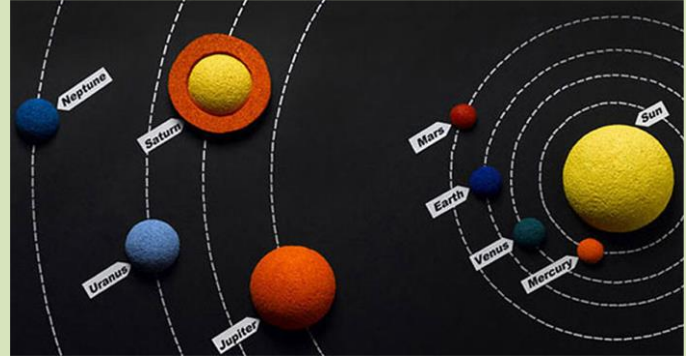

## Spring Term One Homework Project

### Science – Earth in Space

It is time to get creative year 5. I would like you to use materials that you have at home to make one of the following:

1) Make a model of the planets in our Solar System.

2) Write all about life on the International Space Station.

3) Create a 3D model of a space shuttle.

Or complete a homework task of your choice relating to the Earth and our solar system.

We had some fabulous projects so far this year, and this is another chance for you to really amaze and impress your peers and your teacher.

I look forward to receiving your amazing projects by **Monday 3<sup>rd</sup> February 2025**.
