

Year 3
Spring Term Two Homework Project

Science – Biology
‘How do plants grow?’

I would like you to create your own plant growth investigation:

What is the title of your investigation?

e.g. Plant Growth

What question will you ask?

e.g. Does a plant need light to grow?

What equipment will you use?

e.g. soil, pots, seeds...

What will you measure?

e.g. the colour, the length/height...

How will you record your results?

e.g. table, graph...

What did you conclude?

e.g. Plants do need light to grow because...

Alternatively, why not grow your own flowers, fruit or vegetables at home and record the changes through text and photographs.

Or, create your own plant life cycle with text and illustrations.

*Complete your project by the end of
Summer Term 2*
