

Year 6

Spring Term Two Homework Project

For your homework project this half term, I would like you to complete one of the science tasks outlined below. As you are aware we are currently studying 'light' as a science topic so I thought it would be nice to link this half term's project to this topic. Enjoy!

1. Create a silhouette of yourself or someone in your family (or both)

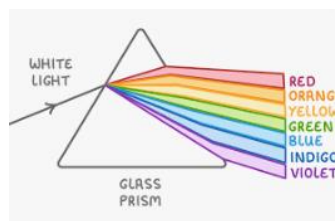

2. Create a periscope

3. Research the work Sir Isaac Newton did on establishing our visible spectrum.

4. Research light prisms or how we see light and create a poster to explain your finding.

Please bring your project in to school for **Wednesday 2nd April 2025**
